THE HOMOS ANSWER BACK

The last issue of DARE featured an article titled "Will Fruits Take Over?" Letters poured into DARE's offices in response to it. Many were explosive. Many asked that homosexuals be allowed to answer. Here, DARE gives them that chance. In future issues DARE will continue to expose the homosexual menace in government, industry, the arts, wherever it arises, so that the people shall know the facts and be able to act!

SWISH IN THE MARINES

Dear Sir,

After reading the April issue of your rag called "Dare," I decided to drop you a line. The story that I mean is called "Will Fruits Take Over." You stated that we are not born this way, well I agree with you. I myself am what you call a homosexual, and have been for five years. Let me tell you how it started. Several years ago a gang of boys grabbed me, and forced me to go with them to a dark alley and there I was made to have sex with them. Since that day I have been "gay." You also stated that today the gay people parade themselves. I am in the Marine Corps and all of my friends suspect nothing.

As for the "gay kids" in New York most of them go there for one reason, to find themselves a "sugar daddy." I have one and see him every time I am in the city. I have finished high school, and have two years of business school behind me. All we want to do is live by ourselves. **Remember a person who is a homosexual is one by his own wishes.** Will close this letter now, hoping that you will take a better view of us.

P.S. I dare you to publish this. Cowards.

DARE always takes a dare, even from a member of the Marine Corps. We don't question anyone's right to be queer until it threatens our right to be normal.

DESIRES TREATMENT

Dear Sir,

This letter is a mild protest to the recent article, "Will Fruits Take Over," appearing in the April issue of DARE. Hasn't this article been prepared by the wrong person? Who is a better authority on homosexuality than a homosexual?

Your reporter has visited the extreme in Greenwich Village, but has failed to get the actual truth of the thoughts and life of Mr. Average Homosexual. I believe myself to be such a person.

If I acquired rather than inherited this trait it was at a very early age (possibly between 12 and 14) when I knew **nothing** of homosexuality. Ignorance can surely be the only explanation for an acquired case. It is difficult to believe that any sex-normal person understanding this abnormality could permit himself to enter this group.

The people in Greenwich Village appear to be living a wild, vulgar existence which I believe is not basically true at all of the average. We live in constant fear of being found out. What could be more shameful and humiliating to not only the victim but also his family and friends. Worse yet, knowing that in our present condition we will never be able to have a family of our own.

"If homosexuals can be made to realize that they are *sick*' and are willing to undergo treatment,

help should be made available to them," quotes the last paragraph. It is for this reason that I am writing you. If there is such a treatment, why not make it known to us and the rest of the public through your magazine? I for one am completely willing and there must be many others who are interested. Isn't it possible that many "cured" homosexuals could help a great deal with the others?

Is there a treatment for homosexuality? If so, what is the nature of it? Where is it performed? How much time is required? What is the expense? After successful treatment (if there is one) can you be positive that you are rid of it for good?

Answers to these questions should provide ample material for an informative report that I am sure would increase the sales of your magazine.

In the event that you should decide to prepare this report, please feel free to use any of the foregoing questions or information. Write me at any time I may be of assistance. My one request is that you keep my name in secrecy through the whole ordeal. You understand why, naturally.

Thank you so very much for your time.

There is no sure cure for homosexuality. However, psychiatric treatment can help. Any doctor can refer you to a reputable psychiatrist. DARE's quarrel is not with the unfortunate homosexual who wants to help himself, but rather with the swish who blatantly declares that his condition makes him superior. There are too many of these, not just in Greenwich Village, but all over the country.

DARE MAKES HIM (HER) SICK

Dear Sir,

Have just read your April Dare. on page 28 it made me sick. Would like to know one thing. why is it every time some mag puts out a story about homosexual's they all go to Greenwitch Village or some place just as bad. i am one of them fruits you talk about. i don't look like a woman nor dress nor put on like one. there are some that do. But a good manny more that dont and wouldent know how. why dident your editor go to the small towns, small citys the farm boys and girls. Ask them the same thing. as far as saying all homosexual's are neurotic that is a stupid thing to say. i don't think i am intellectual superior to a person that isent the same as i am. that cind of thinking is ok for the ones that got carried away some time back. i have been my way as far back as i can remember. i dont fool and kide and a true homo wouldent. i onely go with my kind and i dont try to pass the buck on eny one. i am what i am and that is it. as far as being queer i am not enymore so then most people. i have herd it said it is a sin. some people will say God didnt intend man to be that way. so if he had wanted man to go down the road on wheels he would have put them on in place of feet. smoking a stove pipe in the top of your head. flying. wings on your back. you may say that is stupid. as far as being sick i am sick of hearing it. just what would it be like if everry body in this world were the same way. did you ever stop to think. this the first time i have read your mag. and the last. if that is what i will see in dare. i dont think i care to spent 25c. it is like i said. talk to the homo's that dont look or put on like what you talked to. for every one you see that does swish i can show you 100 that don't. get smart the next time and you may be surprised.

the edators readally grant that u ar intellectual superior to them. so don't spent 25c on DARE. we'll survive!

ENJOYS DARE

Gentlemen,

I enjoy your magazine "Dare" a lot and in this April issue I especially liked the story of "Will Fruits Take Over." In this article it stated that the homosexuals even have a magazine of their own. I would be very grateful if you could tell me how I could get an issue of that magazine. I would like to look one over.

The name of the magazine is "One" and it is sold on some newsstands.

ATTENTION: SALT LAKE CITY!

Dear Sir,

At the time of this writing I have within my possession potent facts concerning Homosexuality in Salt Lake City, Utah.

I can name the people, the places they work, and etc.

I can name the places they frequent.

For the past 4½ months I have been gathering this information. I have gotten them to take me into their confidences. They know me under another name.

I believe that it is now time for these facts to become known to the public, and especially to the people of Salt Lake City.

I believe this would be a tremendous follow up to your story "The Homosexual Menace: A Trap or your Sons!" of April 1956.

I remain, waiting word from you.

DARE maintains a large staff to do research on homosexuals and other matters. They are currently covering Salt Lake City, as well as other major cities to expose homosexualism in all walks of life. Thanks for the offer. We may call on you in the future.

UNFAIR ADVANTAGE

Dear Sirs,

Just read your April, 1956 edition & it seems you take unfair advantage in the article "Will Fruits Take Over? A Homosexual Trap For Your Son." After all, why use those S.B. swishy types to speak for a whole group? There are still many homosexuals who are just as normal looking as the normal set, from whom you would get valid opinions of ourselves. And another thing, you say, why don't we realize we are sick and consult a psychiatrist? In the 1st place, many of us don't have the high price it requires, and in the second place, why doesn't the American public hospitalize such beings, instead of throwing them in prison among the real menaces to society? After all, a paraplegic, arthritic, or any other person with a similar disease is given proper medical attention!

I'm not among those who think effeminacy & genius coincide, however, out of 40% of the American population, being exclusively homosexual, how many genuises should be produced?

Why shouldn't we organize our own night clubs & magazine? We're not accepted in the so called "normal" society.

I'm not saying homosexuality is sacred & right, but I would like every "straight" to picture themselves as living & associating with one of their own sex, trying to derive all the happiness out of life as they would if living with one of the opposite sex, because after all, when we live a normal life, it would be the same difference! Do the normals think they could change their sex drives overnight? I hardly think so! Its not that easy!

And in closing, do so many people forget, that we too are human beings?

Most communities have psychiatric clinics where homosexuals desiring treatment can go. Your figures on "40% of the American population being exclusively homosexual" are way out of line. In no survey, individual or collective has such a figure been claimed. We agree that deviates need medical attention, rather than punishment.

SOCIETY: GO TO H - - L!

Dear Sir:

Hi! First of all on the list I want you to know I am not the least bit angry at your magazine.

I happened to pick up a copy of your publication the other day on the newsstand of Bob's Book Store here in town & happened to notice the story entitled "Will Fruits Take Over." The answer to that question is a huge, **NO.** The author of that particular story is right in thinking that we are becoming more blatant every second, minute, and day. Who wouldn't get tired of hiding every day?

You see, a person of a minority does get tired of silently taking the blame for whatever might come along. The biggest share of us believe in this motto and try to live up to it, "Live and let live." Society apparently doesn't. But we banded together and decided to live in spite of Society and we feel we have a right to live our lives as we see fit, within the law.

I am very willing to admit that every so often one of **us** goes off the deep end and becomes involved with a minor. But does that supposedly speak for all of us? A heterosexual male every so often attacks a minor also!

The story posed another question. Was I born the way I am? The answer is another huge **No.** I was attacked by 3 boys when I was in High School at the age of 16. So here I am at 29, a very unhappy person, a homosexual. Your author seems to think, our condition can be cured. The answer in the biggest share of cases is again, No!

A Doctor can to a certain extent help you to learn and live with it within reason— meaning lifelong sublimation. In other words, living without sex: period. That takes a great deal of will-power which I happen to have plenty of. I have tried in earnest and with all my heart and soul to be cured, with an outcome of $975.00 down the drain and no returns. So therefore I can look anyone in the eye and say I tried and didn't succeed. Yes, I am here to tell you the definition of Homosexuality— A life of **hell** on **earth.** I often wonder why a person like me had to be placed on this earth with society as it is.

Example? I haven't done anyone harm on this earth, so why should society wish to harm me? Meaning stories, names, whistles, catcalls and etc. Society gives a person that has tried their best to be cured just one way out—"Suicide." Well I am here to tell society at this point they can go to H - - L.

Maybe after reading this poorly written letter you can see why we are banding together and will keep it up. Society has declared war on **us.** And then **they** sit back and wonder why **we are blatant.**

Well, thanks a lot for reading my sermon. Hope I didn't bore you too much, but I thought your magazine ought to know you are still writing about human beings when you write about us.

If you feel like dropping me a letter I'd be more than happy to hear from you.

We are not at all bored, but can feel nothing but pity for this writer. We hope he will see that increased blatancy is no answer.
